Art Unit: 1642

1. The Amendment filed April 1, 2003 (Paper No. 13) in response to the Letter of February 26, 2003 (Paper No. 12) is acknowledged and has been entered. Claim 61 has been added. Claim 61 is currently under prosecution.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. It is noted that Applicants believe that the subject matter of claims 56 and new claim 61 is the same. Although Applicants believe that the subject matter of withdrawn claim 56 and new claim 61 is the same, the subject matter is not found to be the same for the reasons of record, that is, that the two claims are drawn to distinct methods which differ at least in objectives, method steps, response variables and criteria for success. Further, Applicant's arguments in Paper No. 11 drawn to the rejection of claims 56 and 59 make clear that the two methods are not the same.
4. The following objection is maintained:

The specification is objected to because although Applicant amended the priority data, the status of the provisional application is not recited. Appropriate correction is required.

Objection to the Brief Description of the Drawings is held in abeyance at Applicant's request.

New Grounds of Rejection

Claim Rejections - 35 USC § 102

5. Claim 61 is rejected under 35 U.S.C. § 102(b) as being anticipated by Kleinerman et al, of record, or Kleinerman et al, of record.

Art Unit: 1642

The claim is drawn to a method to ameliorate a side effect, mucositis, of antineoplasia treatment in a subject, which subject has been treated with an anti-neoplasia agent which comprises administering to said subject a pharmaceutical composition comprising MTP-PE encapsulated in multilamellar liposomes.

Kleinerman et al, 1989 teach a method of treating cancer patients comprising administering pharmaceutical compositions of MTP-PE encapsulated in multilamellar liposomes (abstract and p. 4665, col 2, see Materials and Methods) wherein the patients had been treated with antitumor therapy (p. 4665, col 2).

Kleinerman et al, 1992 teach a method of treating cancer patients comprising administering pharmaceutical compositions of MTP-PE encapsulated in multilamellar liposomes (abstract and p. 212, paragraph bridging cols 1 and 2, see Materials and Methods) wherein the patients had been treated with antitumor therapy (abstract).

The method of the prior art comprises the same method steps as claimed in the instant invention, that is, administering pharmaceutical compositions of MTP-PE encapsulated in multilamellar liposomes to the same population, that is subjects that had been treated with an anti-neoplasia agent, thus the claimed method is anticipated because the method will inherently lead to the amelioration of mucositis. See Ex parte Novitski 26 USPQ 1389 (BPAI 1993).

6. It is noted that the arguments in Paper No. 11 drawn to the rejection of claims 56 and 59 in Paper No. 9 are not relevant to the claimed invention.

7. No claims allowed.

Art Unit: 1642

8. All other objections and rejections recited in Paper No. 9 are hereby withdrawn.

9. Applicant's amendment necessitated the new grounds of rejection.

Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 C.F.R.

§ 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
